

## **Tree Removals and Site Preparation Work Mountain Lake Remediation Project September and October 2012**

In September and October 2012, the Presidio Trust will begin site preparation work in advance of the next phase of the Mountain Lake Remediation Project. This will require creating a staging area north of the lake, a pipeline route, and an access route to the lake. The work includes erecting fencing, removing over 40 trees, clearing vegetation, temporarily closing the spur trail and overlook on the east shore of the lake, and removing ground structures and park benches within work areas.

In November 2012, the Presidio Trust will begin dredging sediment contaminated with lead and motor oil from the bottom of the lake. The sediment will be transported via pipeline to a staging area north of the lake where it will be dewatered. The clean water will be returned to the lake and the dried sediment will be transported and disposed of in a permitted, offsite landfill.

Intermittent closures of sections of Mountain Lake Trail and Park Trail may be required for safety during this work. The enclosed map (reverse side) details the project work areas and highlights alternate routes around the work areas. The staging area north of the lake and the east shore spur trail and overlook will be closed for the duration of the construction project.

Please join the Presidio Trust and Department of Toxic Substances Control (DTSC) for a Community Information Session on the Mountain Lake Remediation Project. This public meeting is an opportunity for you to learn more about the upcoming dredging and impacts on use of Mountain Lake park, including work hours, trail and park closures, truck routes, and noise and odor levels.

**Community Information Session  
Mountain Lake Remediation Project  
Thursday, October 18, 7 pm  
Golden Gate Club  
135 Fisher Loop, Presidio of San Francisco**
