THE PRESIDIO

SAN FRANCISCO'S GREAT ESCAPE

Welcome to the Presidio. This inspiring setting at the Golden Gate has a remarkable past and a fascinating present. We're glad you're here!

A BRIEF HISTORY

Before there was San Francisco, there was the Presidio.

This land was home to native peoples for thousands of years. The Ohlone occupied five villages in what today is the city of San Francisco, including one here called *Petlenuc*. In 1776 Spain established a military fort – *El Presidio* – on this land. The Spanish flag flew over the Presidio for 45 years. After winning its independence from Spain in 1821, Mexico controlled the Presidio and established a new pueblo nearby called *Yerba Buena*.

The United States seized the Presidio in 1847 during the Mexican-American War and soon after renamed the pueblo *San Francisco*.

For the next 150 years, thousands of US Army soldiers passed through the Presidio's gates, serving our nation around the world. The Presidio's growth reflected the emergence of the United States as a world power in the 20th century.

The Presidio is where San Francisco began. Today it is a national park site and a National Historic Landmark District located at the center of the Golden Gate National Recreation Area.

POST TO PARK

In 1972, Congress created one of the world's largest national parks in an urban setting – the Golden Gate National Recreation Area – and declared that the Presidio would join that park should the military ever leave.

In 1989, Congress decided to close the Presidio. Its 218-year tenure as a military post ended in 1994 when the Army lowered its flag for the last time.

Over the past two decades, the Presidio has undergone an exciting "post to park" transformation. The Presidio Trust, the National Park Service, and

the Golden Gate National Parks Conservancy have rehabilitated hundreds of historic buildings for new uses; restored native habitats; built hiking and biking trails; and created scenic overlooks and vistas. The park is now home to 3,000 residents and 200 organizations, including many that welcome visitors.

DISCOVER AND ENJOY

Today, the Presidio is a park that welcomes all.

Begin your day by getting oriented at the Presidio Visitor Center (see p. 6) and learning about the park's fascinating history at the Presidio Officers' Club (see p. 7).

Then head outside for a hike through the forest; see native wildflowers at Crissy Marsh; toss a Frisbee with the kids on the Main Parade Ground; stop for a bite at one of the Presidio's many eateries; or watch the sunset from a scenic vista.

Visit www.presidio.gov to access the daily events calendar and to find suggestions for where to go and what to do.

Let's get started!

Tours of Earth Wall

Saturdays at Noon; meet inside the Presidio Officers' Club

Enjoy a 30-minute tour describing the making of Andy Goldsworthy's most recent addition to the Presidio.

DISCOVER PLACE-BASED ART

Andy Goldsworthy is one of the world's most talented site-specific artists. The Presidio Trust is honored to host the largest collection of his works on public view in North America. His four installations – *Spire*, *Wood Line*, *Tree Fall*, and *Earth Wall* – can be visited individually or enjoyed together via a three-mile loop along the Presidio's trail network.

Goldsworthy in the Presidio was brought to the Presidio by the FOR-SITE Foundation (www.FOR-SITE.org) in partnership with the Presidio Trust.

SPIRE

Located on the Bay Area Ridge Trail near the Arguello Gate

Standing 100 feet tall and surrounded by newly planted Monterey cypress, *Spire* celebrates the rejuvenation of the Presidio forest. The artwork is composed of 37 aging Monterey cypress trees felled from the area and symbolizes the declining forest welcoming the new.

WOOD LINE

Located west of Lovers' Lane near the intersection of Presidio Boulevard and West Pacific Avenue

Wood Line fills a gap in the Presidio's largest eucalyptus grove with a 1,200-foot-long sculpture made up of eucalyptus branches. The sinuous line, in Goldsworthy's words, "draws the place."

TREE FALL

Located in the historic Powder Magazine (95 Anza Avenue) on the Main Post

Tree Fall is located inside a Civil War-era building that once housed Army gunpowder. The artwork is made up of a tree trunk suspended from the domed room and covered with clay that has dried and cracked in a beautiful organic pattern. Drop in for docent-led tours weekends from 10 am to 4 pm.

EARTH WALL

Located inside the Presidio Officers' Club, 50 Moraga Avenue on the Main Post

Earth Wall, composed of eucalyptus branches and clay from the site, is a nod to the archaeological artifacts found near the Presidio Officers' Club. View this piece in the Hardie Courtyard Tuesdays through Sundays, 10 am to 6 pm. Docent-led tours are held on Saturdays at noon.

Take the Tour!

Goldsworthy's installations can be visited individually or enjoyed together via a three-mile hiking loop along the Presidio's trail network.

I do love working in the same place, time and time again. I feel that I can make far stronger work. Spire that's exploring the sense of space. Wood Line [exploring] the surface. Tree Fall getting very subterranean. But that idea of getting underneath the surface - [Earth Wall] has pushed into territory that's new for me, and has opened up all sorts of new possibilities.

- Andy Goldsworthy
